

D1  
liquid in said troughs in one direction; wherein said upper section is composed of a photochromic material so as to get darker in color in response to changes in the intensity of the solar radiation.

**Remarks:**

No new matter has been added either in this amendment or in the substitute specification that was included in the CPA filed 12/12/99.

The amended claims reflect the changes suggested by the examiner in the last office action. We have omitted reference to the "central plane" as well as "plain" as they do not any further specificity to the claimed elements.

It is believed that the application is in condition for allowance.

Respectfully submitted,

  
John P. Halvonik  
Registry No. 32,796  
Attorney for applicant
